SUMMARY

AI/Generative AI engineer with hands-on experience shipping agentic and LLM-powered systems to production, from multi-agent pipelines to LLM-as-judge evaluation frameworks alongside full-stack (React/FastAPI) and DevOps (Docker/Terraform) delivery. Currently interning at PharmaACE on healthcare data and agentic AI pipelines.

EXPERIENCE

Intern at PharmaACE Innovations (June 2026 – Present)

- Built an NPI Smart Matching pilot for a Fortune 500 pharma client using Snowflake's **9.4M-provider** NPPES registry, **auto-resolving 94%** of records and **cutting manual review by ~70%+**.
- Replaced an underperforming vendor with a News Monitor pilot scanning **1,200+** pharma/biotech sources every 30 minutes through an LLM-free pipeline (**~$0.08 total cost**) plus an LLM-as-judge validation layer.
- Building a Forecast Reporting Agent that turns natural-language questions into validated, self-correcting SQL through a multi-step LLM pipeline, with automated chart recommendations and golden-dataset evaluation.

LEADERSHIP & ACTIVITIES

Chairperson at Information Technology Student's Association (ITSA), VIT Pune (July 2025 – June 2026)

- Led a **50+ member** team through a department-wide AI workshop (**500+ students**), mock GDs/PIs, and an **INR 1 lakh**-budget event, building an automated QR-attendance system that drove **750+ footfall**.

PROJECTS

Enterprise Workforce Training Platform (*Project Completion Letter* | *GitHub* | *Blog*)

- Developed a cross-platform LMS with role-based dashboards for trainers and trainees (module creation, scheduling, assessments, progress tracking), delivered as a containerized React web app (Docker Compose).
- Provisioned cloud storage with Terraform, secured routes with JWT/bcrypt, added server-side PDF/video watermarking per trainee, and configured a Jenkins CI/CD pipeline.
- *Technologies:* Python, FastAPI, SQLAlchemy, MySQL, ReactJS, React Native, Docker, Terraform, AWS S3, Jenkins

DailyDiff: Autonomous Multi-Agent Tech Curation Platform (*Live Link* | *GitHub* | *Blog*)

- Designed a **7-agent** LangGraph pipeline (Scout, Skeptic, Research, Verifier, Analyst, Editor, Publisher) that scrapes GitHub/Hacker News/Dev.to, fact-checks findings, and compiles a curated developer briefing.
- Deployed live with a GitHub Actions cron scheduler and Mistral-Gemini failover, dispatching briefings to **9 active subscribers** 3x/week via a multi-provider fallback (Brevo/SMTP/Resend).
- *Technologies:* Python, LangGraph, LangChain, FastAPI, Mistral AI, Gemini, PostgreSQL (Neon), React, Vite, GitHub Actions, Brevo API

SKILLS

Languages: Python, SQL, JavaScript
GenAI Frameworks: LangChain, LangGraph, Hugging Face, MCP
GenAI Techniques: RAG, Multi-Agent Systems, Tool/Function Calling, Prompt Engineering
LLM Evaluation & Safety: LLM-as-Judge, Golden-Dataset Evaluation, DeepEval, Guardrails, LangSmith
Machine Learning: Deep Learning, NLP, Transformers, Embeddings
Web Development: FastAPI, Pydantic, REST APIs, React
Databases: PostgreSQL, MySQL, Chroma (Vector DB)
Cloud & DevOps: AWS, Docker, Terraform, Jenkins, GitHub Actions, Git
Core CS: DSA, OOP, DBMS, OS

EDUCATION

B.Tech, Information Technology at Vishwakarma Institute of Technology, Pune, India (Sept 2023 – May 2027)

- CGPA: **9.01/10** (Expected)

ACADEMIC & EXTRACURRICULAR ACHIEVEMENTS

- Winner, INDOvateAI Sprint 2025 (Best Outstanding Project among **200+ teams**).
